SUMMARY

Full Stack Developer with 3+ years building scalable web, mobile apps and APIs. Specialized in React/Node.js and Svelte ecosystems, with production experience. Strong foundation in algorithms, data structures, and code optimization. Passionate about solving complex problems and delivering performant software solutions. Available for remote roles. English C1.

WORK EXPERIENCE

Freelance & Independent Projects

Remote

Full Stack Developer

February 2025 – Present

- Delivered 3 freelance websites and a mobile app for independent clients as a solo developer, handling requirements, development, and delivery end-to-end.
- Built and launched QRcaes, a SaaS platform allowing pet owners to create pet profiles and generate QR codes for collars with contact information — reached production before being paused for a full concept and architecture overhaul.
- Developed Newsbetter, an in-progress SaaS newsletter platform where users can publish newsletters, manage subscriber pages, accept payments for subscriptions, and purchase email send limits.
- Built Daily Rosary, a Duolingo-style prayer app for daily rosary practice, and Daily Tasks, a habit tracker and routine reminder app.
- Studied Domain-Driven Design (Evans) and Clean Architecture (Martin) — actively applying both in ongoing projects.
- Learned Svelte/SvelteKit through a small self-directed project.

LXP EAD - Alta Performance Web

Brasília, DF, Brazil

Full Stack Developer — Next.js, NestJS, TypeScript, MongoDB

February 2024 – August 2024

- Joined a small 5-person team working on a messy, bug-heavy codebase and contributed actively to cleaning it up — refactoring code, improving architecture, and helping reduce reported bugs by over 50%.
- Redesigned core data models and proposed structural changes that improved system organization and long-term maintainability.
- Developed new backend features in NestJS, including business logic layers and API endpoints consumed by the Next.js frontend.
- Contributed to technical discussions during team meetings, offering suggestions on system design and expected behavior that helped the team make clearer decisions and move faster.

Gredom Sistemas

Campo Mourão, PR, Brazil

Frontend Developer — React, React Native, JavaScript

July 2021 – July 2022

- Delivered features, bug fixes, and performance improvements across 12–15 client projects simultaneously in a software house environment, including large enterprise accounts.
- Improved frontend load times noticeably across web and mobile apps through caching strategies, code splitting, and rendering optimizations.
- Integrated third-party and internal REST APIs into React and React Native interfaces across multiple projects.
- Refactored existing codebases to improve readability, reduce duplication, and ease future maintenance.

Etico Software BR**Ji-Paraná, RO, Brazil***Software Developer Intern — React, Golang, Java Spring Boot**November 2019 – February 2020*

- Gained hands-on exposure to production systems across three different stacks — React, Java Spring Boot, and Golang — building foundational understanding of how real-world software is structured and deployed.
- Contributed to an in-house ORM project under active development, producing internal documentation to help the team understand its design and intended usage.
