SUMMARY

Full stack developer with 3+ years of experience shipping production web and mobile applications with React, Next.js, React Native, Node.js, and NestJS. Comfortable owning features end-to-end — from data modeling and API design to frontend implementation — and applying Domain-Driven Design and Clean Architecture principles to keep growing codebases maintainable. Experienced working solo as well as inside small, fast-moving teams. English C1, available for remote roles.

SKILLS

Frontend: React, Next.js, React Native, TypeScript, TailwindCSS, ShadcnUI, Svelte/SvelteKit

Backend: Node.js, NestJS, RESTful APIs, Spring Boot, Vitest

Languages: JavaScript, TypeScript, Java, Python, HTML5, CSS3

Data: MongoDB, PostgreSQL, MySQL, Redis

Tools & Practices: Git/GitHub, Docker, AWS, CI/CD, Agile/Scrum, automated testing

WORK EXPERIENCE

Full Stack Developer — Freelance & Independent Projects, Remote *Sep 2024 - Present*

- Designed and delivered 3 client websites and 1 mobile app end-to-end as solo developer, owning requirements gathering, architecture, development, and delivery.
- Built and shipped QRcaes, a SaaS platform for pet owners to generate QR-coded collar tags linked to contact profiles, taking it from concept to production before initiating a architecture overhaul to support planned growth.
- Building Newsbetter, a subscription newsletter SaaS with publishing, subscriber management, and Stripe-based payment handling for both reader subscriptions and send-limit purchases.
- Shipped Daily Rosary and Daily Tasks, two React Native mobile apps (guided prayer practice and habit tracking), covering the full product cycle from UX design to app store-ready builds, while applying Domain-Driven Design (Evans) and Clean Architecture (Martin) principles across projects.

Full Stack Developer — LXP EAD - Alta Performance Web, Brasília, DF, Brazil *Feb 2024 - Aug 2024*

- Joined a 5-person team on a legacy, Next.js/NestJS/MongoDB codebase and led a refactoring effort that cut reported bugs by over 50%.
- Redesigned core data models and proposed structural changes that improved long-term maintainability and reduced onboarding time for new contributors.
- Built new backend features in NestJS, including business logic layers and REST endpoints consumed directly by the Next.js frontend.
- Contributed system design input in team meetings that helped the team converge on decisions faster and avoid rework.

Frontend Developer — Gredom Sistemas, Campo Mourão, PR, Brazil *Jul 2021 - Jul 2022*

- Delivered features, bug fixes, and performance improvements across 12-15 concurrent client projects, including several large enterprise accounts, in a software house environment.
- Reduced frontend load times by an estimated 20-30% across web and mobile apps through caching strategies, code splitting, and rendering optimizations.
- Integrated third-party and internal REST APIs into React and React Native interfaces across multiple client projects.
- Refactored legacy codebases to improve readability and reduce duplication, easing future maintenance for the team.

Software Developer Intern — Etico Software BR, Ji-Paraná, RO, Brazil *Nov 2019 - Feb 2020*

- Gained hands-on production exposure across three stacks (React, Java Spring Boot, Golang) and contributed to an in-house ORM project, authoring internal documentation on its design and usage.

EDUCATION

Bachelor in Computer Science — Universidade Tecnológica Federal do Paraná (UTFPR) *Feb 2021 - Jul 2026*

COURSES & PROFESSIONAL DEVELOPMENT

Node.js (NodeJS | NestJS | TypeScript | MongoDB | PostgreSQL) — Rocketseat;
GoStack (React | NodeJS | React Native | TypeScript | NextJS) — Rocketsea;
Scientific Computing with Python — freeCodeCamp.

LANGUAGES

English (C1) | Spanish (B2) | Portuguese (Native)
